Great Basin Incident Commander Conference Call Agenda 2015	
Date: 9/8	Note taker: G. Dingman
GB MAC/GACC Coordinator: Agenda/Incident Commander Discussion Points: <u>Summarize the following in 4 min or less:</u> <ul style="list-style-type: none"> • Fire Size / % contained / # of people / Cost to date • Significant changes since the last 209 • BRIEF fire synopsis /Critical Incident Information (use Directional vs DIVS's) • Political Issues / Community Meetings • Closures / Evacuations / Public Safety Issues • Major Safety Concerns / Injuries / Accidents • Critical Resource Needs • Resources Available to Reassign/Share/Demob 	
Predictive Services:	<p>...Significant Warming Trend This Week...</p> <p>...The big story this week will be high pressure building across the Great Basin leading to a significant warming/drying trend. Temperatures will quickly return to normal levels early this week...then becoming 5 to 10 degrees above normal by the latter half of the week, with the warmest conditions across the western half of Nevada.</p> <p>Winds at the surface becoming primarily light and slope driven, while gradient winds aloft mainly NW with diminishing speeds through the week.</p> <p>Under this strengthening high pressure ridge, mid and upper slopes will begin to see increasingly poor RH recoveries as thermal belts become better organized.</p>
GBCC Update:	13 fire / 152 acres / 1 new acres on the large fire in Northern Utah Wheeler fire UT-SES – 275 acres -
1 Fire: Tepee Springs IC: Ourada	<ul style="list-style-type: none"> • 94703 / 65% of objectives / 921 people / 18.4M • IR flight last night, temps will increase into the 90s by weekend.
